

URBAN GROWERS

Our kickstart
consult

Helping you grow your own food is our passion and speciality.

We know that people want to give growing a go, so we've put together the Urban Growers Kickstart Consult. This consultation helps us to combine your ideas with our urban growing expertise so you can begin to grow food on your balcony, courtyard, rooftop, wall or yard.

RONNI KAHN, OZHARVEST

"Urban Growers developed our edible garden from nothing! We now have two magical spaces that are lush, delicious and a treat to behold! I love it!"

A photograph of a wooden deck against a white brick wall. On the left, a shovel leans against the wall. Next to it is a woven basket filled with large green leafy plants. In the center, a pitchfork and a long-handled tool lean against the wall. To the right, a blue metal watering can sits on the deck, next to some logs. Further right, a wheelbarrow is partially visible.

This consult package is for the diy
person that wants specific knowledge
and practical ideas for their garden.

This is what we will cover during our meeting.

- Your ideas on the look and feel of your new garden
- The food you would love to grow
- Herb, veg, fruit tree selection and what will grow best where
- Potential layout of pots, planter boxes and fruit trees for best results and functionality
- Irrigation options
- We will assess soil structure + pH and give remedial recommendations
- Give you seasonal advice on what to plant
- Health check of your current plants and check for pest/disease problems
- Product and practical recommendations

If you would like further help after the consultation we can offer you a quote for smaller tasks to get your garden back in shape. We can also help source and deliver heavier items such as pots or more established fruit trees.

For larger spaces, bigger dreams, or perhaps staged work - we would recommend an Urban Growers Concept Design. Please get in touch if you're interested in this option.

The overwhelming majority of people are dependent on the production of food far from their homes to

meet one of their most basic needs. We are focused on working with communities and individuals to grow, nurture and harvest their green spaces, educating them on the multitude of benefits of homegrown produce.

Byron believes in creating local food systems and allowing people to take back some level of food control through education. Byron is a horticulturist who specialises in the design, creation and maintenance of productive gardens for residential and commercial spaces.

Total investment - \$290
This price includes a free copy of our book, Slow Down and Grow Something.

So, are you ready to grow?
